LEGAL RISK MANAGEMENT

Mitigating Disputes from Failure of Prevention

We utilize ISO 31022 standards to engineer disputes out of existence. Don’t just manage risk, standardize against it.

SMEs & Startups

When we are asked to help.

You Are Scaling Rapidly

You are entering regulated markets and need a risk framework that grows with you, without the overhead of a full in-house department.

How We Assist & Our Expertise

We conduct a review evaluating the likelihood of risk occurrence and potential impact. We then deliver a bespoke Legal Risk Management Plan fully compliant with ISO 31022 that serves as your roadmap for growth without liability.

Large Enterprises

When we step in.

You Need Real-Time Oversight

Your organization is too complex for static reports. You need a dynamic system to monitor cross-jurisdictional risks as they emerge.

How We Assist & Our Expertise

We help you develop a dedicated physical or virtual “War Room” for monitoring, assessing, and addressing legal risks in real-time, facilitating rapid cross-functional collaboration and communication.

Complex Governance

Why clients seek our expertise.

Your Departments are Siloed

Your legal, finance, and operations teams are not talking to each other, creating invisible vulnerabilities.

How We Assist & Our Expertise

We innovate your internal structure by pooling together diverse skills from various departments, lending a comprehensive understanding to tackle specific legal risks before they become lawsuits.

Digital Resilience

The ideal time to engage us.

Your Contracts Expose You to Liability

You are migrating critical infrastructure to cloud-based systems and face unidentified data sovereignty and operational risks.

How We Assist & Our Expertise

We assess the digital transition. We provide risk assessment to global companies on executing management systems, identifying vulnerabilities in data localization and service continuity to prevent catastrophic operational failure.

Education & Accreditation

Certificate details.

We Build Your Internal Immunity

We are committed to empowering your team. Wasel & Wasel is proud to have jointly developed the AGRC Certificate in Legal Risk.

The Qualification

A professional certification designed to equip your team with the knowledge to identify, assess, and manage legal risks effectively. It integrates international standards, including ISO 31000 and ISO 31022. Accredited by The London Institute of Banking & Finance (LIBF), ensuring it meets the highest standards of professional education.
