Space and Defense

The Economy of the New Frontier

Gravity is a physics problem. Permission is a policy one. We align commercial ambition with sovereign security.

Regulatory & Licensing

Assisting you in critical times.

You Need Permission to Launch

You have the hardware, but you lack the orbital slot. You are navigating the bottleneck of spectrum coordination and landing rights in emerging jurisdictions.

How We Assist & Our Expertise

We clear the regulatory path. We advised a major US satellite operator on the launch and licensing of non-geostationary satellite stations in the Gulf, handling ITU filings and spectrum priority rights to ensure your constellation has a legal home in the sky.

Export Controls

When we step in.

You Are Acquiring Sensitive Tech

You are moving defense-grade technology across borders. The risk of ITAR/EAR violations or sanctions non-compliance threatens the entire transaction.

How We Assist & Our Expertise

We ensure the transfer is compliant. We advise defense firms on the acquisition and legal operation of advanced dual use technology. We navigate the intersection of commercial sales and national security compliance.

Sovereign Advisory

Why clients seek our expertise.

You Are Building the Infrastructure

You are a government entity or contractor developing the legal framework for a space-faring nation.

How We Assist & Our Expertise

We are architects of space policy. We have advised states in drafting national space legislation and on the legal architecture of a national spaceport. We define the rules of the road for new space powers.

Space Tourism

When we are asked to help.

You Face Claims in the New Economy

You are a private individual or high-net-worth customer facing breach of contract or disputable practices by launch providers.

How We Assist & Our Expertise

We protect the rights of the first generation of private space travelers and launchers. We counseled space tourists on claims against a major space tourism firms, and advised space tourism operators.

Lobbying & Reform

The ideal time to engage us.□□□

The Policy is Behind

Your commercial objectives are blocked by outdated regulations or a lack of legislative framework in the US or abroad.

How We Assist & Our Expertise

We pursue policy changes. We have advised commercial space firms on federal lobbying strategy before Congress and executive agencies in support of launch, spectrum, and space infrastructure legislation, bridging the gap between innovation and regulation.
